

NS700 Network Media Center Introduction

Actually, The data network offer the network enjoy based on the PC server..if you want read another PC data,you should assure that PC open and connected the network.At the common family and SOHO status,there are only few people found a set of server within 24 hours for the enjoying data .But NS700 network media central can make you free to visiting and enjoying the storage data .

Company level network storage product mainly on data copy,the authorization right limit,speed and stability,but for the family and SOHO design NS700 network media central.it have good easy is first condition.

At the storage quantity,NS700 support perfectly storage top to 1TB(1000GB)SATA hard disc,When you enlarge storage, you can free to connect USB storage equipment by USB port.

NS700 as a heart of the digital family,it can contract storage and manage all of data file,your music,digital picture and digital HDTV ect. The biggest features that hard install and software install very easy,no need authorization have too much network knowledge. It can be convenience network storage change to empty hard disc,you can use easy for the NS700 like use the hard disc.Support UPnP Media Server,it no need set the NS700 storage Music,Photo,Video enjoy your network media player or wireless music player. Strong P2P download ,it can free PC download automatic too much source,support BT,Ed2k,ftp,Http.

NS700 data enjoy,many authorization manage and long time using advantage,NS700 can free PC using separately, you only should connect the network ,then can offer the data storage serve for the network authorization.it very easy and can add per your required.

NS700 a smart PC actualy,it make the easy and advantage specify network storage At the hard and soft.it have very higher advantage and using effectivity and stability.NS700 have soft enlarge ability, can rich the function by offering the different appliance part.

Our company already develop based on NAD technology family and SOHO NS600 and NS700 serial.the speed more fast 1000M support hard RAID NS800 and NS1000 are developing.will be finished at Nov ,2007. it include wired/wireless,USD transfer disc,NAS and more function Combo etc,instation and set very eady, stability , it can apply for digital family,SOHO office,vide ad,long video education and video control ect.

NS700 mainly function and features:

- A) It specify digital family authorization ,very easy and instation smart,you can free to finish the instation and based on WEB accomplish system management and protection.
- B) File server support Windows、 MAC and Linux.
- C) UpnP family media central,no need set and connect digital player equipment(DMA and (DMA and Network Media Player). will storage NS700 picture,video and music transfer to HDTV.
- D) P2P download central support BT、 Donkey、 FTPand Http. all of based on

Web ebm management, can long control and manage your download and new download,can use your web within 24 hours,no need PC completely,it can set search engine inside and can search too much source.

E) FTP server support long control send and download(support UTF,many language file)

F) Print server support USD printer,speed can finish network enjoy print.

G) support too much storage SATA disc to 1TB(tested0,offer the largest storage data space,the user can enlarge storage by USB storage equipment.

H) 3 piece USB2.0 high speed Host port,can connect more USB storage equipment(USB disc,SB transfer disc,USB digital camera and USB card reader etc)

I) Can support WiFi 8.11b/g ,the highest 54M wireless connect and support WPA transpotion ,(can select set)

G) Low function waste and save power,support hard disc sleep.

K) 1 piect USD2.0 Salve port,NS700 can use as the USB transfer disc, can easy change file without network.

L)System and person engineer design ,No need tool when instill disc.

M)One key copy function, CopyLED can light and shows copy successly when your USB port interfact USB storage equipment. This is put the Copy button,will copy the USB equipemnt date to NS700.

The NS700 appilance sample as below:

(Remote office server): easily install,management,convient and remote management. And so easily complete remote file enjoy.

(Software distribution): Put the install and revise softward in the NS700,each final equipemnt can enjoy ,install and no need CD copy each.

Workgroup file enjoy: larger file, usually file storage NS700,can improve to apply server ability,cut net transfer defects.

(Graphics library): larger pictures,CAD file ect to storage NS700, can improve user Visiting speed,no need put the file from file.

(Drive image server): System adminstrator can use PowerQuest DriveImage Pro or Symantec Ghost make the usual softward tailor Drive image server,and storage the Drive image file to the NS700,another users can enjoy those file, can easy user system installtion and also can improve file server steability.

Portable server:It is prone to take a great many of documents.

Workstation backup:Backup important datas,it also can be used for the daily increment of applying server.Besides,datas and users' documents can temporarily be kept in when

the main document sever of network is updated.

Apply CD-tower:It can be used as the substitute of CD-tower. It can enhance the visiting speed of datas by storage 10 pieces of CD datas in NS700.In the mean time,it can decrease the abrasion of the CD. Moreover,the cost and maintenance of NS700 is lower than CD-tower.

Home server: In home network,it can be used to storage audio & video program and children teaching program, or be used as home digital multimedia server, to storage digital photoes,life kinescope,high-clearly HDTV program and so on.

If you need more detail specification of the product, pls land our company's web site. We will be very plesant to design and make products for the users of special trades and mass-quantity purchasers.-
