

# Video Sensor Switching Box

Model No.: **GSR-2**

## Introduction

This “Video Sensor Switching Box” is designed to expand camera working with DVR or other surveillance system. With this box, maximum 5 cameras (total 6 cameras) can be expanded on one channel. The user can easily set any number (zone) of the cameras for sequence mode or stay on any selected channel mode and automatically go to sequent mode in case any camera under the box other than selected channel detects motion. The box will bring you convenience and intelligence on your surveillance choice.

## Special Features

- Expand maximum 5 cameras per channel for each box.
- Auto sequence or selected channel view.
- CAT-5 cable.
- Working mode from 2 to 6 channels (zone) selectable.
- Channel (zone) select button design to select any zone under the box.
- Auto switching when any camera detects motion.
- Auto sequence record when 2 or more cameras detect motion.
- Auto sequence recording time selectable.
- System camera design.
