

H303

- Brilliant green lamp
- Anti-shock design of hard disc drive
- Extensive front panel-accessed ports

Side View

I/O hidden design

Side Air Duct Included

With a sharp sword-inspired appearance, H303 provides a stable game platform for game enthusiasts. It features superior manufacturing technique and makes tender and colored flash when during operation. On the front panel, you can find four USB 2.0 ports and one IEEE 1394 port, which make it easy for extending functions. Made of high quality imported galvanized steel with a thickness of 0.7 mm, the whole case looks reliable and professional. The shockproof piece can protect your computer from the negative influence caused by the external shock. This case is perfectly designed for game players.
