

# DDS2800

## Single-phase Electricity Meter

### General Description

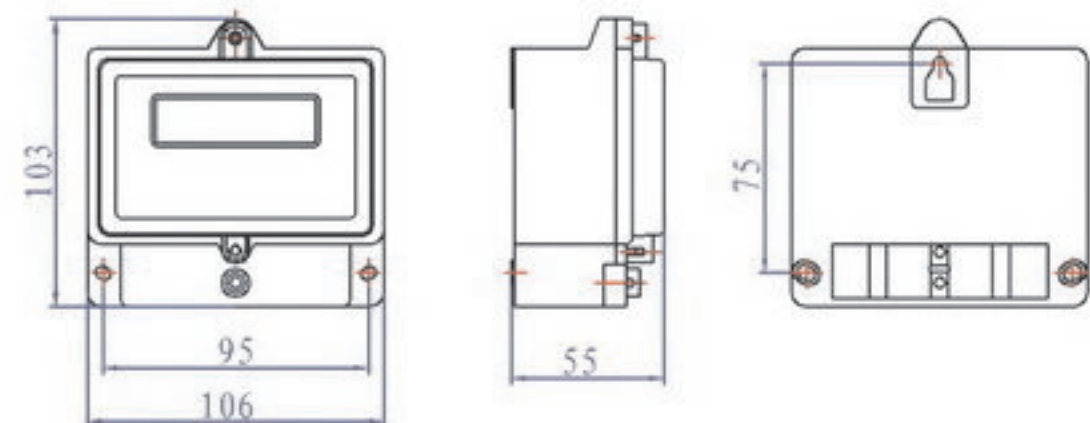

The DDS2800 is an electronic meter for measuring active energy. The meter has two options for display: register and LCD display. The active energy measurement is Class 1 with a stable performance throughout the curve.

The meter base for the meter is made of compact polycarbonate with fiberglass which gives the meter double insulation and high mechanical strength.

### Characteristics

- Class 1 to IEC62053-21
- Always positive measurement
- 10 years service life
- Degree of protection IP 54

### Dimension:mm

### Specification

Meter Type	Unit	DDS2800			
Accuracy		Active Class 1			
Reference Voltage(Un)	V	110V, 120V, 220V, 230V, 240V			
Basic Current	A	5	5	10	10
Maximum Current	A	40	60	80	100
Reference Frequency(fn)	Hz	50 or 60
