

Information

Fashion outlooking and wonderful hand feeling same as iPhone finishment, MiLi™ power pack makes your dreams not yours alone.

Charging

You can use the included USB cable to charge the MiLi™ power pack. When iPhone is well put on MiLi™, which is connecting with electrical source. iPhone will be charged first until fully charged, then to MiLi™. When electrical source is cut off in condition of iPhone power less than 100% and MiLi™ more than 5%, MiLi™ will charge iPhone until it is fully charged until MiLi™ less than 5%.

Battery consumption

When iPhone and MiLi™ are connecting with electrical source to MiLi™, iPhone's consumption comes from electrical source. If electrical source is cut off, then the consumption comes from MiLi™ until its power less than 5%. In simple way: first consumption choice is electrical source, second MiLi™ power pack, third iPhone battery.

Four LED lights indication

Press on the button to indicate real power in MiLi™.

LED light From left to right

1st LED light shine power < 25% 2nd LED light shine power 25-50%
3th LED light shine power 50-75% 4th LED light shine power 75-100%

Sync

When using MiLi™ power pack with your iPhone, you can sync your iPhone to iTunes without removing MiLi™ power pack.

Safety Quality Control

We choose grade "A" cells, Japanese or Taiwanese made protection IC circuit and other highest quality raw materials. We conduct 15 tests on each stage of assembling process starting from every parts, work-in-progress, to final product. Any defective parts and work-in-progress are rejected. Protection IC circuit will prevent MiLi™ power pack from short-circuits, over-charging, over-discharging, or malfunctioning even under the most extreme conditions.

Reputation & Integrity

We believe that qualified people make quality products, therefore, we emphasize the training and discipline of every employee to ensure the highest quality. During the past 22 years, we built up our reputation as the top brand for our quality.

Experienced R&D

We employed our own engineers from top schools to research and develop our products. Our R&D team is famed to be able to customize battery packs in the shortest turnaround time.

Reliability

Our goal on reliability is to achieve ZERO defects before shipping to our customers. We have tested all battery cells with HT™ (High Temperature Test) technology using EU standards. They will further ensure our battery packs can sustain high heat.

Certification

MiLi™ power pack has gotten CE approval, with ISO9001:2000 certificate, and passed SGS inspection and RoHS standard as earth-friendly products.
