

Dear Customer,

Our company is one of the subsidiaries of Haier Group, a very famous group company in China and some part of the world. We are located Qingdao Port, one of the big port of China.

We have established ourselves as a reputable and reliable OEM & ODM supplier of electronic products by providing Electronic Manufacturing Services ("EMS"). Our products include PCBA from various industries, Box-Build assembly like Wireless & wired remote controller & receiver and power supply, etc. We also undertake the complete product service from the design and development to manufacturing based on our OEM customers' requirements or contract manufacture these products for our OEM customers by providing the contract manufacturing service.

We've invested more than \$18 million in our 10,000-square-meter testing center to ensure we meet your QC requirements. Our center houses 18 labs for inspecting electronic parts and 12 labs for testing finished products. These labs are equipped with machines from Sanyo, TDK, Siemens and Panasonic. This allows us to make sure your items carry CE, UL and TÜV approvals.

We also obtained the certification of ISO9001 and ISO 14001 and passed several time's company audits from the third parties like SGS.

Our EMS service has been widely recognized by the customers from all over the world with our high quality assurance service and cost-effective service. Based on the goal to be the most competitive EMS provider, our EMS service has been successfully expanded to the worldwide companies of whirlpool, Samsung, Panasonic, Mitsubishi, Sanyo and HP.

Hope our EMS service will bring you highest profit with your lowest cost. Please contact us.

Thanks.
