

Introducing

MP3 miniCast FM Transmitter[®]

You can now enjoy your iPod[®] tunes or MP3 songs through a full range of FM frequencies, from 88.1 to 108.0 MHz. Our uniquely designed miniCast FM Transmitter works on any FM stereo receiver to wirelessly connect a portable music player to your car or home stereo, quickly and easily.

Our miniCast features 10 programmable memory slots allowing you to save the clearest station wherever you go.

miniCast also contains a microphone so that you can broadcast your message at a gathering clearly and conveniently.

Advantages

- Your music is readily available anywhere, simply connect your iPod, PDA, MP3 player, CD player, or any of your devices via a 3.5mm jack
- Transmits on 200 FM channels, from 88.1MHz to 108.0MHz
- Memorizes up to 10 FM frequencies
- Includes a built-in microphone
- Features Auto-seek makes stations easy to find
- Includes lock function, to prevent any selection being made once locked.
- Features low energy consumption, maximize play time, 1 AAA battery is all you need
- Operating range: 3-9 meters (a distance of 3 meters or less will minimize interference and provide the strongest signal)
